ET : TASTE IMPROVING, MINERAL SUPPLYING, AND SALTY TASTE- REINFORCING AGENT

PURPOSE: To improve th taste, to increase the mineral-content, and to reinforce the salty taste of foods, drinks, seasonings, and feeds, by adding a composition composed mainly of bittern to the foods, etc.

CONSTITUTION: Bittern is added with a **calcium** salt which is not precipitated with the sulfate ions in the bittern, e.g. **calcium** lactate, **calcium** gluconate, **calcium glycerophosphate**, **calcium** pantothenate, etc., to compensate the **calcium** lost in the bittern preparation process. The mixture is used as an agent for improving the taste, increasing the mineral content, and reinforcing the salty taste of foods, drinks, seasonings, and feeds.
